Description
The Department of Health Care Services (DHCS) has proposed a Drug Medi-Cal Organized Delivery System (DMC-ODS) Waiver Amendment that would amend the current Section 1155 Bridge to Reform Demonstration Waiver. The DMC-ODS provides a continuum of care modeled after the ASAM Criteria for substance use disorder treatment services enables more local control and accountability, provides greater administrative oversight, and creates utilization controls to improve care and efficient use of resources. Among the changes forwarded by this amendment is the increased role and responsibility of counties for the selection and credentialing of providers. This training is designed to assist individuals who may be involved with operationalizing the DMC-ODS at the county level to understand and better plan how to effectively and efficiently certify substance use disorder treatment programs.

Learning Objectives
• Participants will be able to list the key elements required for the county to prepare as they establish their provider selection and credentialing process.
• Participants will be able to identify important steps for a provider to accomplish before applying for DMC Certification under the 1115 Waiver.
• Participants will be able to clearly define the role of county and the department (DHCS) in the DMC certification process.
• Participants have a better understanding of the development of checklists and guides to facilitate efficient application reviews and uniform program evaluations.
