(Mileage costs are covered according to the training policy on Central Region website for those who drive their personal vehicles to the training).

Training Description and Objectives
Currently, WRAP® is being utilized in formal and informal recovery programs in all 50 U.S. States and in several countries around the world. Researchers from the Department of Psychiatry at the University of Illinois recently conducted a study of 80 individuals who participated in WRAP® programs; the research revealed “significant improvements in symptoms and many psychosocial outcome areas associated with recovery” (Cook, et al, 2009).

WRAP® Facilitators Certification. This is a five-day intensive workshop for certification of WRAP® Facilitators. This seminar certifies participants to facilitate WRAP classes and equips them with the skills and materials to facilitate classes in their communities and organizations.
