Primary Goal

INCREASE ACCESS to OUD prevention, treatment & MAT services to African American youth/young adults 12-24

Additional Multicultural Groups

Youth/Young Adults Assoc. w/

- Veterans
- Persons w/Disabilities
- Recent incarceration or re-entry into community w/Hx of Rx , Opioid Misuse or at risk

What were your results?

Engaged in ~ 97 activities reached approx. 722 youth, young adults, professionals, stakeholders

Teens Mix Prescription Opioids with Other Substances

Nonmedical use of prescription (Rx) opioids by teens remains high, and a new study shows that 7 out of 10 teen nonmedical users combine opioid medications with other drugs and/or alcohol. This puts teens at much greater risk of overdose.

7 out of 10 teen nonmedical users combine Rx opioids with other substances¹

The substances most commonly co-ingested were...

Teens who reported co-ingestion of Rx opioids with other drugs were²...

8X more likely to report abusing marijuana 

4X more likely to report being drunk ≥ 10 times 

Percent of teens that usually or always combine Rx opioids with marijuana or alcohol³

(1) McCabe et al., Drug Alc. Dep., 2012; (2) Compared to no past year nonmedical use; (3) Among nonmedical users of Rx opioids

What will you do next? How will you sustain your progress?

- Increase Community activities related to increasing awareness of SUDS/ODU prevention & reducing stigma of OUD and accessing OUD MAT which had the most impact.
- Community Partnership + Collaboration = Recipe for Sustaining Progress
