Treatment (Decision Making and Intervention)

Discharge Planning

Care Coordination

Discharge

Supports for Wellness and Recovery

Advanced Assessment

C Overview, Analysis and Methodology

Project and Expert Panel

- Recovery Orientation
- Project Scope and Charter
- Framing the Issues
- Rationale for Statewide Clinical Assessment Guidelines

Table of Contents

- Key Drivers for Change in Policy and Practice
- Core Competencies

Components of the Ideal Assessment

The Clinical Assessment Guidelines for Involuntarily Detained Individuals

Pre-Detainment Assessment

General Considerations for Clinical Assessment Guidelines

Recommendations for Administration

Paradoxical Recommendation

Summary of Next Step

D Module 1: Philosophies and Practices

Introduction and Overview

Recovery Model

Ethical Standards of Behavioral Health Related to Recovery

Legal Issues

Conclusion

Reference and Additional Resources Conclusion

References

Additional Resources

E Module 2: Core Competencies

Introduction and Overview

Competencies for Meeting, Existing Policy Expectations and Regulations,

- Individualizing Clinical Descriptions of Persons with Schizophrenia,
- Understanding Medi-Cal Treatment Planning Requirements,
- Understanding Progress Documentation Requirements,

Table of Contents

Documentation Requirements,
Crisis Intervention and Verbal De-Escalation,
Shared Decision Making,
Trauma Informed Care,
Emotional CPR,
Motivational Interviewing,
Assessment Tools for Prediction of Violence,
Assessment Tools for Prediction of Suicide Risk,
Advance Directives
References

F Module 3: Administrative Implementation

Overview
Recovery Principles Relevant to Staff Development,
Dissemination of Innovations,
The Role of Supervision and Middle Management in Policy Implementation,
Performance Criteria for Effective Supervision,
References: role of Supervision and Middle Management in Policy Implementation

G Module 4: Addressing Substance Use Disorders During Involuntary Detention

Introduction and Overview
An Integrated Approach to Addressing Substance Related and Primary Mental Disorders,
Street Names of Commonly Used Drugs,
Drug Interactions

Table of Contents

Symptoms of Substance Use Disorders Diagnostic and Statistical Manual of Mental Disorders (DSM-5) Criteria

The Substance-Induced Syndromes,

Screening and Assessment Frameworks and Tools

- TICS,
- The CAGE-AID Questionnaire,
- CRAFFT (for Adolescents),
- SSI-SA,
- NIAAA Screening Tool,
- TWEAK and T-ACE,
- AUDIT,
- ASSIST,
- MAST,
- S-MAST-G,

A Person-Centered Approach to Interviewing for Substance Use,

Assessing Phases of Recovery,

Administrative Issues Related to Substance Use Disorders

Interactions with Drug Medi-Cal

Self-Help Resources
