Billing and Reporting Challenges in the More Complex Era of Health Care Reform: Implications for Health Information Technology
Colorado

- The Triple Aim:
  - Better Health: Improving the overall health of Coloradans
  - Better Quality: Enhancing consumers’ health care experiences
  - Lower Cost: Containing costs and premiums

What does that mean?

- All Payer Claims Data Base – APCD
  - Transparency
- Regional Care Collaborative Organizations (RCCO)
  - Medicaid Managed Care 2.0
- Behavioral Health Organizations (BHO)
  - Behavioral Health Managed Care
- C-stat
  - Management analytics designed to pinpoint performance areas in need of improvement and then improve those outcomes
Billing Environment

- Expand the ability to provide services and maximize billing in different billing environments:
  - Fee for Service
  - Direct contracts
  - Capitation
  - Case Rates
- Data analytics is a tool that will allow you to control your destiny.
  - They level the playing field.
EHR’s allow you the ability to be transparent
Improve your ability to demonstrate outcomes
Make better clinical decisions
Dashboards allow clinicians as well as administrators feedback allowing for improved decision making.
Allows for collaborative decisions to align efforts and resources to affect positive change.
How are we adapting to the changing environment

- New EHR
- New Dashboard with analytics that will allow us to analyze all data points in real time.
- Lowering our cost to provide service
- Redefining ourselves as more than a community mental health center
- Strategic alliances with all healthcare providers
