Complex Care Management - A Collaborative Approach

Presented By:
Sarah Eberhardt-Rios, MPA
Health and Human Services Branch Director
Sutter – Yuba Behavioral Health
Presentation Roadmap - How Will We Spend Our Time Today?

- Overview of Association Level Collaboration on Eating Disorders
- Benefit Mapping for Medi-Cal and Medicare in California
- Tips for Collaboration

Conversation as we go!
Presentation Agreements

Eating Disorders are a Covered Diagnosis:
Under Specialty Mental Health Services (SMHS) administered under Mental Health Plans (MHP)
Primary and Specialty Health Services Administered under Medi-Cal Managed Care Plans (MCP)
For SMHS:
California Code of Regulations (CCR) Title 9, Section 1830.205 (outpatient), 1820.205 (inpatient), item N
Health and Safety Code Citation

California Health and Safety Code - HSC § 1254.5

(a) The Legislature finds and declares that the disease of eating disorders is not simply medical or psychiatric, but involves biological, sociological, psychological, family, medical, and spiritual components. In addition, the Legislature finds and declares that the treatment of eating disorders is multifaceted, and like the treatment of chemical dependency, does not fall neatly into either the traditional medical or psychiatric milieu.

(b) The inpatient treatment of eating disorders shall be provided only in state licensed hospitals, which may be general acute care hospitals as defined in subdivision (a) of Section 1250, acute psychiatric hospitals as defined in subdivision (b) of Section 1250, or any other licensed health facility designated by the State Department of Public Health.

(c) “Eating disorders,” for the purposes of this section, shall have the meaning of the term as defined in the 1980 Diagnostic and Statistical Manual of Mental Disorders, as published by the American Psychiatric Association.
MHP’s and MCP’s
Recent History of Collaboration
Association Level Collaboration

- In 2016, The California Association of Health Plans (CAHP) and the California Association of Behavioral Health Directors (CBHDA) facilitated an Eating Disorders Workgroup

- The eating disorders work group intersected with a series of quarterly meetings DHCS was facilitating for MHP’s and MCP’s to discuss issues, problem solve and share successful models of collaborative care and care management for beneficiaries with medically and psychiatric complex health care needs

- Medical Directors, Physicians, Clinical Behavioral Health Directors, Care Management Staff from both MCP’s and MHP’s

- Child and Adult Issues
Workgroup Members on the Roster

Armita Rai - IEHP
Rosie Cortez - IEHP
Arlene Ferrer - IEHP
Lawrence Gonzaga - IEHP
Dr. David Block, MD - IEHP
Jennifer Clancy - IEHP
Athena Chapman - CAHP
Elizabeth Iverson - CAHP
Dr. Duane McWain, MD - Anthem
Dr. Clayton Chau, MD - LA Care
Linnea Koopmans - CBHDA

Dr. George Crits, MD - Orange County HCA
Dr. Irene Sung, MD - SFDPH
Jessica Blake - MHN
Dr. Michael Brodsky, MD - Molina Health Care
Dr. Stuart Butlante, Ph.D -Kaiser Northern California
Dr. Terry Rooney, Ph.D - Colusa County
Dr. Vanessa de la Cruz, MD - Santa Cruz County
Dr. Teresa Frausto, MD - San Bernardino County
Dr. William Arroyo, MD - Los Angeles County
Sarah Eberhardt-Rios - San Bernardino County
Heather Anders - CBHDA
Collaborative Questions

- How to deal with the etiology of the condition including the “roving or to and fro” nature of the condition
- How to deal with a condition that required multiple transitions across services, systems, and levels of care in a short period of time
- How to deal with a condition that required all treating providers to, “know together,” the drivers, status, treatment approach, as well as the shaping or contributing dynamics to the condition in home, health and social situations
- How to deal with a shared treatment plan for Medical and Psychiatric Complexity (and also, fragility) for adults and children
- How to create a shared, collaborative and dynamic treatment plan that stretched across multiple types of settings
- Understanding of settings of eating disorder referral origination
- Understanding of benefit structures through which care could be accessed
Referral Origins for Children and Youth up to 21 Years

Outpatient Referral Pathway – Eating Disorder identified in primary care setting by:

- Pediatrician / PCP
- MCP/MHP Plan

Inpatient Referral Pathway – Need for medical stabilization:

- Inpatient Acute Psychiatric Unit (Psychiatric Stabilization)
- General Medical Unit (Refeeding/Medical Stabilization)

Residential Treatment
Partial Hospital Program (PHP)
Intensive Outpatient Program (IOP)
Full-Service Partnership (FSP) – Outpatient Program

MHP and MCP can both receive referrals and refer to multiple care settings: outpatient and inpatient. The pathway is not linear and complex care coordination must be nimble enough to allow for multiple entry and destination points throughout the entire course of treatment as the consumer’s medical and psychiatric needs change.

Challenges Still Exist - Looking Forward

- Additional conversation is still needed at the association and plan/county levels
- Clarification is needed from DHCS
- Practice Guidelines still require fleshing out
- Care team membership and complexity require intensive coordination
- Coordination according to acuity
Care Team at Highest Acuity

- Team Lead(s):
  - MHP Complex Care Coordinator
  - MCP Complex Care Coordinator for Behavioral Health AND Complex Care RN

2. Beneficiary
3. MHP treatment team (e.g., therapist, psychiatrist, RN, case manager)
4. Residential and/or Board & Care facility rep (if applicable)
5. Community-based organization(s) rep (as/when appropriate)
6. MHP Leadership Representative with Decision Making (MD, Dep Dir)
7. MCP Leadership Representative with Decision Making (MD, Clin Dir)
8. MCP subject matter expert and and/or Primary Care or Pediatric Physician. (e.g., eating disorder specialist, dietician, oncologist) or significant medical-based supports (e.g., Hospice)
9. Hospital staff (MD/DO, RN, social worker, discharge planner), if applicable
10. Alcohol & Drug Counselor (AOD) as assigned

*Sometimes the MCP has delegated member supports out to the Independent Physician Association (IPA) managing the beneficiaries care and those “MCP” supports would need to be requested from IPA.
Tips for Managing at the Plan Level

- Understand origination of referral - Where is it coming from?
- Understand beneficiary coverages
- Involve MHP medical leadership immediately
- Request Complex Care RN MCP Rep or BH MCP plan level rep/liaison be assigned to case
- Understand what service is being requested and assess timely with the MCP
- Request program daily schedules for suggested level of care to include daily activities to best understand treatment regimen and make up
- Discuss payment terms with MCP
- Work to understand your MCP’s contracted resources
- Establish shared protocols for complex care management practices that extend across plans, treatment settings and levels
Tips for Supporting Practitioners

- Understand and support concern
- Provide training on eating disorder treatment in person and or through purchasing books
- Provide clinicians skill building time at work
- Design an internal process that is easy for clinicians and care teams to follow
- Provide clinicians flexibility for scheduling and nimble treatment needs
- Provide clinical leadership support on cases and well as role guidance
- Familiarize yourself with the American Psychiatric Association or other Practice Guidelines for Eating Disorders [https://www.psychiatry.org/psychiatrists/practice/clinical-practice-guidelines](https://www.psychiatry.org/psychiatrists/practice/clinical-practice-guidelines)
- Clarify benefits/service trajectory and clear the way for care team
- Allow clinician time for psychoeducation with adults and family members
- Understand the “infrequency and variability gap,” patterns for clinicians/care teams
Questions?

“Sutter-Yuba Behavioral Health (SYBH) is the Mental Health Plan (MHP) for both Sutter and Yuba Counties. As the MHP we are responsible, per our contract with the California Department of Health Care Services (DHCS) to provide through directly operated services, or arrange through contracted providers, Specialty Mental Health Services (SMHS).”
